GHOSTSENTRY™

Your key to remote access control

With Class II games, you have a problem.

You have to control vendor access and show the logs when you're audited. The problem is, you don't control the vendor network.

Manual logs are really hard to keep, and not very accurate. Bottom line is that you're under pressure to accomplish the impossible.

GHOSTSENTRY was designed to give you back the power.

With **GHOSTSENTRY**, you regain control of every vendor.

You will immediately have the ability to approve and deny access requests.

You are in charge and have the logs to prove it.

Start your free trial of
GHOSTSENTRY
today and stop worrying
about your next audit.

Start using
GHOSTSENTRY today,
and you'll have a MICS
compliant log from now on.

In fact, if you ever fail an
audit of remote access logs,
we will credit your account
and help you write the
response.

There's no better solution
for your Class II gaming!
